INDUSTRIAL SAFETY
SAFETY IS ALL WE DO™

OUR MISSION

To create and innovate dependable safety products for industrial applications. Our portfolio of brands help identify and safely secure vehicles and assets, protecting the people who work alongside them. We proudly manufacture our safety products in the USA for the harshest environments in the WORLD.

OUR PURPOSE

At Driver Industrial Safety™, SAFETY IS ALL WE DO™. Our passion is to solve the critical need for well-engineered and dependable products for worksite safety. To ensure the best solutions, our innovation is driven by global partnerships and field tested in the world's harshest working conditions.

SAFETY IS ALL WE DO™

Driver Industrial Safety™ is a quality manufacturer of market-driven industrial Safety Products for industrial and commercial industries. We are a privately owned and operated company headquartered in Phoenix, Arizona, U.S.A. With manufacturing and warehouse facilities in the US and Canada, we sell through our global distribution channels. Driver Industrial Safety™ was originally founded in 2004, under our former recognized name SafetyWhips®.

Our 6 branded product lines lead the industry in robust quality and engineering: RhinoGuard™ Cable Protectors and Ground Protection Mats, NVIZN Identification Displays®, SafetyWhips® Warning Whips, Helios Warning Lights®, Toro® Heavy Duty Wheel Chocks, and Industrial Decals Co.™ & OEM Graphics.

Our company was founded on the basis that there is a critical need for well engineered and dependable products for work site safety. Clients have come to Depend on Driver to keep their worksite safe. Our combined 100+ years in combined LED and electronics manufacturing provides the best engineered products available for worksite safety. While Driver Industrial Safety™ products have been poorly copied, we are still unmatched in performance and durability.

RHINO GUARD™

CABLE PROTECTORS & GROUND PROTECTION MATS

CABLE PROTECTORS

➡ 25% Lighter Due to Advanced Reaction Injection Molding (RIM)

➡ Improved Functional Design with Snap On/Off Lid.

➡ Custom Colors and Logos Available Allowing for Personalization.

➡ Manufactured in the USA.

GROUND PROTECTION MATS

➡ Offers General Purpose and Heavy Duty Mat Options.

➡ Configurable Applications with Connectors.

➡ Chemical, Oil, and UV Resistant.

➡ Dual Traction Surfaces.

MADE IN THE USA

NEW!

5-Channel Cable Protector

Benefits

Introducing the **RhinoGuard™** 5-Channel Cable Protector: Built on decades of experience, expertise, and knowledge of what it takes to manufacture the best product in the market. Our cutting-edge manufacturing process means superior advantages over other cast-molded products. RhinoGuardTM is ideal for use in the Entertainment, Temp Power, O&G, Utility, Construction, and Industrial markets.
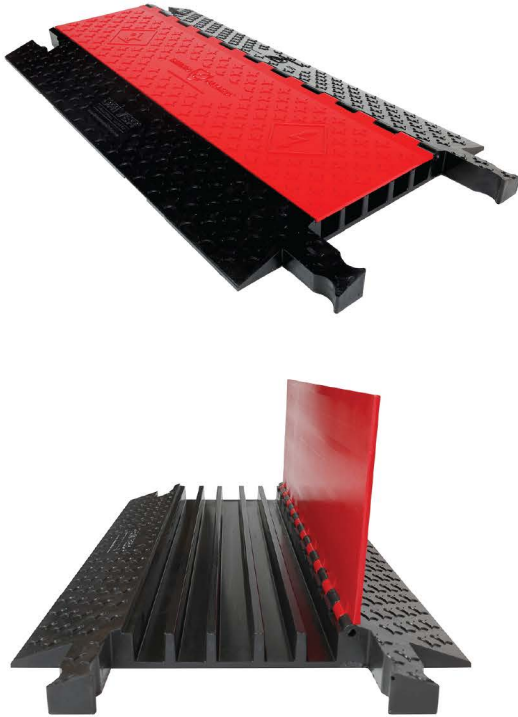

STANDARD LID OPTIONS

■ (Red)	**RG513A-RB** Red Lid/Black Base
■ (Black)	**RG513A-BB** Red Lid/Black Base
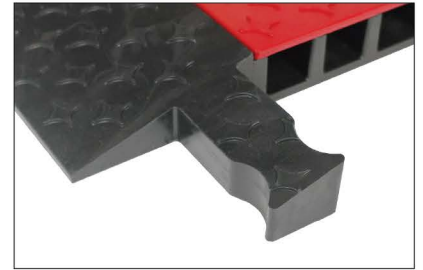

Easier to connect and disconnect compared to cast molding. No sharp edges.

Snap on/off lid for easy field lid swapping, no fiberglass rods required. Made with the most popular connector, compatible with other brands.

Protects cables/hoses up to 1.3" outside diameter, with a center channel accommodating up to 1.6" outside diameter.

Specifications

Product Attribute	Product Description
Model Numbers	RG513A-RB, RG513A-BB
Load Capacity Per Axle (lbs)	30,000
Load Capacity Per Tire (lbs)	15,000
Length (Inches)	36.0
Width (Inches)	19.8
Height (Inches)	2.0
Weight (lbs)	21.0
Max Cable Outside Diameter (Inches)	1.32, 1.6 (Center Channel)
Number of Channels	5

Diamond tread pattern designed for improved traction.
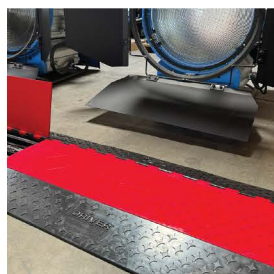

RhinoGuard™ Ground Protection Mats

Easy Installation and Configurable ▪ Two Tread Patterns ▪ Portable Matting System

NEW!

General Purpose Ground Protection Mat

Introducing the **RhinoGuard™** General Purpose Ground Protection Mats: the NEW durable, general purpose mat is strong enough to move vehicles and equipment across, yet man-handable for quick and easy installation. Stronger and sturdier than plywood, without rotting, becoming water logged, warped, or splintered from weather exposure. Perfect solution for temporary vehicle roadways in muddy or soft ground conditions, protecting delicate sports turf or lawn from damage, or a pedestrian walkway at construction sites, or events. Ideal for the utility, construction, landscape, oil and gas, mining, and event industries.

Two Surface Traction Design

RG4X8-B Black Mat

Handholds

Elongated Connection Holes

Connector Holes
12 connection holes providing options for installation configuration (M10 flange head bolts included)

Benefits

Connectors Available
2-Way (RGC-2WAY)
4-Way (RGC-4WAY)

Two excellent traction surfaces for safe movement of vehicles and pedestrians.

Elongated connection holes with 2-Way and 4-Way connectors with unique hole design for adjustments.

Four hand cut-outs and grips for easy handling and safe lifting.

Specifications

Product Attribute	Product Description
Model Number	RG4X8-B
Color	Black
Pallet Quantity	40
Load Bearing Capacity (Tons)	120
Length (Feet)	8.0' (2410 mm)
Width (Feet)	4.0' (1200 mm)
Thickness (Inches)	0.8" (20 mm), 0.5" (12 mm) Core
Weight (lbs)	79.4 lbs (36 kg)

NEW!

Heavy Duty Ground Protection Mat

Introducing the **RhinoGuard™** Heavy Duty Ground Protection Mats: a NEW proven standard in highly portable, yet heavy duty matting solution. Thicker, stronger modular system with built-in connectors offers maximum support for any vehicle. This heavy-duty solution is the most durable and functional portable matting system for temporary access and is ideal for creating access roads, walkways, pavement protection, event flooring, parking lots, and job site compounds. The heavy-duty mat is typically used by construction sites, utilities and infrastructure, geotechnical, military, civil engineering, logistics, and rental industries.

Two-Sided Tread Patterns

RG6X3-HD-B Black Mat

Built-in Connectors

Overlapping Lipped Connectors

RHINO GUARD™
RhinoGuardProtection.com
Part No: RG6X3-HD-B

Benefits

Thicker, stronger modular system with built in connectors.

Two tread patterns offer superior grip in all directions.

Overlapping lipped connectors offer maximum support and mud suppression.

Easily handled by two workers without lifting equipment, at 88 lbs. per mat.

Specifications

Product Attribute	Product Description
Model Number	RG6X3-HD-B
Color	Black
Pallet Quantity	25
Load Bearing Capacity (Tons)	130
Length (Feet)	6.0' (1829 mm)
Width (Feet)	3.0' (914 mm)
Thickness (Inches)	1.0" (25 mm)
Weight	88 lbs (40 kg)

IDENTIFICATION DISPLAYS

- #1 Brand Choice for Leading Mine Sites
- Globally Recognized for LED Identification Displays
- Supporting Standard Vehicles & Heavy Equipment
- Engineered with Advanced LED Technology
- Lowest Power Consumption in the Industry
- Lightweight & Easy to Install
- Maintenance Free
- Manufactured in the USA

MADE IN THE USA

Bright & Rugged LED Displays ▪ **Most Dependable in the Industry** ▪ **Maintenance Free** ▪ **Field Tested for Over 20 Years!**

NVIZN™ LED Programmable Displays are the most efficient form of LED displays Driver Industrial Safety™ has to offer. Recognized globally for dependability, high visibility, and programmable functionality. LED Programmable displays provide the most robust and efficient solution to identify any vehicle or heavy equipment especially under extreme, low visibility weather conditions. NVIZN™ products have proven to be the most visible enabling continuous Day and Night operation on countless mine sites with the luxury of no maintenance. We offer up to (5) characters within our Single-Framed displays for users to efficiently program multiple numbers, letters, or characters and/or messages for required equipment identification. Determine your Mounting and Distance Criteria™ (DC) requirements to ensure you select the right Type, Size or a Combination of displays to safeguard workers and site management so they are easily able to identify unit number, unit status, speed limit, payload weight, or otherwise, from afar. Count on Driver Industrial Safety™ to protect your valued Personnel & Assets!

Signal Light displays serve as signaling devices for various operational modes and directional guidance. They use color signals like "Red Light, Green Light" to indicate equipment use, vehicle direction, or personnel movement. These lights help manage site traffic, show forward and reverse modes, or denote autonomous vs. manual operation, ensuring clear communication and safety on site.

Universal Platform Mounting Systems

Complete Customizable Mounting Systems for Alternative Mounting Locations, Maximizing Vehicle & Equipment Visibility!

Driver Industrial Safety™ strives for the best possible safety solutions to maximize safe site operations globally. We are constantly driving our product ideation towards improving Vehicle and Equipment visibility standards. Our SafetyWhips® Universal Platform Mounting Systems epitomize innovation by supplying your team with alternative mounting solutions for multiple standard communication devices on any type of vehicle or equipment. These mounting systems are high-strength and extremely durable; constructed of a powder-coated Steel Platform surface (for magnetic devices) and various mounting holes to securely attach all basic Safety and Communication Devices directly to the platform. Customers with non-magnetic vehicles and equipment find this solution most beneficial with it's versitility; can be installed within a vehicle's hitch (with a SafetyWhips® Hitch Mount) or mounted on the rear of a toolbox. Mounting these units are very easy and perfect for temporary use. Your outfitting possibilities are endless as we offer full customization opportunities per jobsite protocol. Simply add one of our custom NVIZN™ 3-Sided Light Duty Identification Displays, a Helios Warning Lights® heavy duty LED Beacon, then top off with a SafetyWhips® Heavy Duty Whip (up to 12ft). All mounted atop a 3ft or 5ft heavy duty for a completed system. Depend on Driver for your jobsite safety solutions!

➡ 3rd-Party Tested to Meet Compliance Standards

➡ Resistant to Oils, Fuels & Solvents

➡ Tough Urethane Construction

➡ Manufactured in the USA

Heavy Duty Wheel Chocks

MADE IN THE USA

Most Dependable in the Industry ▪ *Tough Urethane Construction* ▪ *Manufactured in the USA* ▪ *Field Tested for Over 10 Years!*

We pride ourselves with the precision and rugged construction of our TORO® products. TORO® Wheel Chocks surpass quality standards and are all manufactured in the USA. Driver Industrial Safety™ hit the mark with its TORO® product lines; leading the industry in reliable and dependable chocking solutions for any type of vehicle or heavy equipment. TORO® chocks comply with multiple industry safety requirements including MSHA (Mine Safety and Health Administration), OSHA (Occupational Safety and Health Administration), NFPA (National Fire Protection Agency), DOT (Department of Transportation), SAE (Society of Automotive Engineers), and ANSI (American National Standards Institute) standards. We offer a variety of wheel chock structure styles to serve specific industry needs as well as ANSI compliant safety color and custom color options (General Purpose chocks only) for added support in providing safe and creative site-management solutions to ensure a safe working environment at all times.

Our General Purpose line of TORO® wheel chocks are engineered for quick and secure installation typically used for Land Vehicles such as trailers, pickups, utility vehicles, dual axle vehicles, and other standard size vehicles. Constructed with tough Urethane for lightweight and easy mobility, high visibility ANSI compliant safety colors and holes for mounting with rope, chains, or mounting brackets. All model styles are 3rd-party tested for compliance and support GVW's (Maximum Gross Vehicle Operating Weight) ranging from 15 Ton (30,000lbs or 13,607.77kg) to 40 Ton (80,000lbs or 36,287.39kg).

Our Heavy Equipment line of TORO® wheel chocks are heavy duty and engineered to safely secure Heavy Equipment Vehicles such as haul trucks, loaders, cranes, fire department vehicles, large military trucks, and heavy underground mining vehicles. Constructed with tough Urethane for lightweight and easy mobility with built-in strong carrying handle on the back side of each wheel chock. These large chocks are highly visible (ANSI compliant safety colors) with user-friendly mounting bracket options for quick and secure loading on the vehicle. All model styles are 3rd-party tested for compliance and support Maximum Payload Capacities ranging from 40 Ton (80,000lbs or 36,287.39kg) to 400 Ton (1,600,000lbs or 362,873.90kg).

TORO® Wheel Chocks "User Safety" & "Proper Chocking Procedures" Guides available upon request!

PROPER CHOCKING

ATTENTION! Wheel Chock Users...

IMPORTANT SAFETY WARNINGS AND INSTRUCTIONS: Wheel chocks are extremely effective safety tools providing optimum security when used correctly. Users must comply with all warnings, guidelines and instructions provided with each TORO® product. Wheel chocks MUST BE used in pairs, positioned downhill firmly against the tire and below the truck's center of gravity. Meaning, place a chock in front of both front tires if the truck is disabled and traveling down a grade, and in traveling up a grade while disabled place a chock in back of both rear tires of the truck. If the direction of the grade cannot be determined chock the front and back of one wheel. In severe conditions, it's necessary to use multiple pairs of chocks. Wheel chocks MUST BE positioned firmly and squarely against the center of the tire tread. If not properly positioned, the wheel chock will not be effective to it's expected potential. These are generally accepted chocking procedures, and it is the responsibility of the end user to make the final determination of how the vehicle should properly be chocked based on the provided circumstances. Our main goal is to inform and educate users on how to properly use our TORO® wheel chocks. Testing & qualification is required for individual vehicles and for correct product selection to meet site requirements. Many factors MUST BE considered before selecting and using our wheel chocks. Advised Gross Vehicle Operating Weight (GVW) is a guide only. This will vary due to environmental factors. Please complete an adequate risk assessment before using the chocks. DO NOT use chocks if chocks are damaged. Perform regular inspections looking for cracking, chipping, and any other noticeable concerning physical malfunctions.

POSITION CHOCK TIGHTLY AGAINST TIRE TREAD

3 TIRE SIZE
IDENTIFY the tire diameter of the vehicle to select the correct wheel chock needed.

1 GROSS VEHICLE OPERATING WEIGHT
MUST understand the GVW of the vehicle to determine the necessary wheel chock for your specific requirements.

2 MAXIMUM LOAD CAPACITY
Based per chock. Each chock is designed to handle a certain amount of Tonage. MINIMUM of (2) chocks required per vehicle.

4 GROUND SURFACE
BE AWARE of the environmental conditions and ground surface the tires are exposed to.

SAFETY IS ALL WE DO™

HE-XB-SPA-W
X-MOD Series LED Beacon mounted on vehicle rack
(Permanent Mount, Short Profile - Amber Lens & White LEDs)

Driver Industrial Safety™ drove game changing innovation with its X-MOD Series heavy duty LED beacon line. Engineered with the most groundbreaking technology and design, the X-MOD Series stands apart from all market competition. Boasting quality, durability, and cutting-edge capabilities to ensure the right for various jobsite needs. For years, our Helios Warning Lights® products are known to deliver solid product performance, easy maintenance, and versitility. Helios Warning Lights® X-MOD Series portrays that and much more. Our X-MOD Series beacons are industrial strength, multi-voltage from 10 to 48vdc, meet Class I/II & California Title 13 Requirements. All X-MOD internal components are protected with an impact resistant outer polycarbonate dust dome that has a smooth, dust-free finish that is very easy to clean. Our optically enhanced Fresnel lens design is revolutionary to the industry for leading-edge quality LED light output. Available in both Single and Dual Colors, with easy selectable colors and flash patterns!

The X-MOD Series Modular Replaceable Parts are a remarkable feature! Enabling you to manage your fleet of beacons with minimal replacement cost of replaceable parts versus buying a new beacon each time. Along with a fully replaceable part structure, X-MOD beacons are constructed with a Universal Easy Mount Design for use on all vehicles including Aluminum Bodied & "Ribbed" Roofs. The Aerodynamic and Ribbed "Easy Mount" Design provides superior performance for all vehicles and safely operates at speeds up to 75 mph (121 kmh).

Driver Industrial Safety's X-MOD beacons are Made in the USA and backed by an industry leading 3-year limited warranty. Industrial industries such as mining, construction, and transportation experience harsh weather and working conditions which require a strong robust warning light. When it comes to extreme durability and adaptable warning lights, Driver Industrial Safety's X-MOD Series has you covered!

Helios Warning Lights® X-MOD Series Beacons are heavy duty and constructed with a durable **Universal Easy Mount Design** for use on all vehicles including Aluminum Bodied & "Ribbed" Roofs. The Aerodynamic and Ribbed "Easy Mount" Design provides superior performance at operational speeds for all vehicles including those with a roof which is ridged, ribbed, or corrugated in any way. For increased beacon stability, X-MOD's magnetic mounting option features strong, overmolded magnetic feet. Also preventing any vehicle damage or scratches. When it comes to reliable solutions, Driver Industrial Safety™ has you covered!

The Collapsable, Extendable & Heavy Duty "Adjustable" Whip!

SafetyWhips® Heavy Duty Telescoping Whips are extremely versatile and an excellent solution to maintain site safety during unforeseen circumstances when quick changes need to happen! Driver Industrial Safety™ succeeded with this Mine-tough™ whip solution with heavy focus on developing a heavy duty, highly visible, and very user-friendly product. With it's "adjustable" capabilities these whips are especially advantageous for high traffic environments and quick change site management needs, which in turn maintains a safe site workflow. These whips are designed with durability and include (3) locking sections - (2) locks for quick and easy whip length adjustments and built with rigid wrapped Heavy Duty Fiberglass. 24 hour Vehicle & Equipment identification is key in our industry, which is why we constructed both Powered & Non-powered Telescoping Whips with collapsable lengths down to 79in (6.58ft/2m) and full extension up to 252in (21ft/6.40m). Outfit your fleet today with SafetyWhips® Telescoping Whips!

Super Duty "All Weather" Warning Whips

MADE IN THE USA

Fully Customizable Whip Assemblies, built to handle the most Extreme Weather Conditions!

SafetyWhips® Super Duty All Weather™ Whips are super-sealed and built for strength! These robust whips are no joke. They're extremely reliable with increased durability due to the addition of "locked-in" shielding components (top and bottom); sealing against harsh environments to ensure protection from moisture & corrosion. In addition, we offer complete whip assemblies and optional customization for any Super Duty All Weather™ whip to ensure your needs are met. Standard whip lengths offered from 1ft (.30m) to 12ft (3.66m) with various SafetyWhips® Accessory & Mounting options available!

Super Duty LED Warning Whips

The Toughest LED Whip Built To-Date!

Driver Industrial Safety™ exceeds all industry competition with our fully lit Super Duty LED Warning Whips! Without a doubt, our SafetyWhips® brand of warning whips stepped up with this innovative product solution. The Super Duty LED Whip is a "must have" when you're vehicle or equipment is experiencing Extremely Harsh weather conditions and in need of a highly visible, extremely durable, reliable, and weather-resistant whip solution. Built with safe & non-conductive heavy duty Fiberglass, these whips are Mine-tough™ and able to handle the worst of conditions. Engineered with advanced LED technology and constructed of a solid fiberglass internal pole with rugged polycarbonate external tubing for advanced protection against impact. SafetyWhips® Super Duty LED Whips allow other drivers to identify operating vehicles sooner, especially in low visibility environments. With standard whip lengths available from 4ft (1.22m) up to 12ft (3.66m), our customization options (custom sizes and LED colors) allow for more efficient workflow for your management team. Identify specific job functions, contractors and site personnel quickly. **Depend on Driver** to provide enhanced solutions for your site safety!
